ABOUT THE COLLEGE

A.M. Reddy Memorial College of Engineering and Technology (AMRN), popularly known as AM Reddy College was established in the year 2008, by A.M. REDDY EDUCATIONAL SOCIETY in Petlurivaripalem, Narasaraopet, Palnadu (Dt.) by Sri. A. SRINIVASA REDDY, the Chairman. AM Reddy College is affiliated to Jawaharlal Nehru Technological University Kakinada and approved by AICTE. AM Reddy College is located little far from the hustle and bustle of the city life in a scenic and serene environment spread over an extensive 10.9425 acres amidst the lush fields just 3 kms away from Sub-Urban of Narasaraopet. The institute has set a benchmark in providing its students the very best in terms of infrastructure and academic services. The college meticulously implements quality policy, absolute discipline, well ventilated classrooms, multimodal teaching methodology, a dedicated canteen, separate hostel facilities for boys and girls, a fleet of buses, a mineral water plant, spacious auditorium, and outdoor grounds, and all supported with uninterrupted power backup.

ABOUT THE DEPARTMENT

The MBA department offers a two-year postgraduate program in management with 60 seats available. The MBA program aims to develop competent managers with analytical skills, decision-making abilities, and leadership qualities for various sectors of the economy. The MBA department has qualified faculty with industry experience and research expertise who provide quality education and training to the students. The MBA department also organizes seminars, workshops, industrial visits, and placement activities to enhance the knowledge, skills, and employability of the students. The MBA department follows the curriculum and guidelines of the Jawaharlal Nehru Technical University and is accredited by the All India Council for Technical Education.

ABOUT THE COLLEGE

A.M. Reddy Memorial College of Engineering and Technology (AMRN), popularly known as AM Reddy College was established in the year 2008, by A.M. REDDY EDUCATIONAL SOCIETY in Petlurivaripalem, Narasaraopet, Palnadu (Dt.) by Sri. A. SRINIVASA REDDY, the Chairman. AM Reddy College is affiliated to Jawaharlal Nehru Technological University Kakinada and approved by AICTE. AM Reddy College is located little far from the hustle and bustle of the city life in a scenic and serene environment spread over an extensive 10.9425 acres amidst the lush fields just 3 kms away from Sub-Urban of Narasaraopet. The institute has set a benchmark in providing its students the very best in terms of infrastructure and academic services. The college meticulously implements quality policy, absolute discipline, well ventilated classrooms, multimodal teaching methodology, additional trainings for campus placements, caring teachers, committed staff, proactive managing committee, vigilant security, a dedicated canteen, separate hostel facilities for boys and girls, a fleet of buses, a mineral water plant, spacious auditorium, and outdoor grounds, and all supported with uninterrupted power backup.

ABOUT THE DEPARTMENT

The CSE department offers B.Tech in Computer Science and Engineering. The department has well-equipped computer labs, qualified faculty, and industry collaborations. The department aims to provide quality education and training to the students in the field of computer science and engineering¹. The department was established in 2008 with an intake of 120 students for the B.Tech program and 18 students for the M.Tech program. The department has six computer labs with 368 systems with high configuration and fully air-conditioned, along with an incubation center¹. The department also conducts various events and activities to enhance the students' skills and knowledge.

ABOUT THE PROGRAMME:

A 5-days Block chain technology program involves covering key concepts, practical applications, and hands-on exercises. Here's a suggested outline for a 5-day Block chain program. This program covers the fundamentals of Block chain, practical implementation, and emerging trends. It's important to adapt the content based on the audience's prior knowledge and the specific goals of the program. Additionally, interactive elements like group discussions, case studies, and Q&A sessions can enhance the learning experience. This program aims to cover the essential aspects of Block chain technology in a structured manner. Depending on the audience's background and the level of detail desired, each session can be adjusted accordingly. Incorporating hands-on exercises and practical applications will enhance the participants' understanding of Block chain concepts.

RESOURCE PERSON

1. Dr.N.GOPAL KRISHNA
Assoc Prof

PROGRAMME CONTENTS

- ❖ Introduction to Block chain
- ❖ Block chain Architecture and Platforms
- ❖ Smart Contracts and Development
- ❖ Understanding Smart Contracts
- ❖ Decentralized Applications (DApps)
- ❖ Block chain Security
- ❖ Privacy and Compliance
- ❖ Scalability and Interoperability

Chief Guest :

1.Dr.K.Tirupathi Rao (HOD CSE) KLU University

**Department of CSE****5-Days FDP on Block chain Technology****PROGRAMME OBJECTIVES**

1. **Increased Transparency:** Blockchain aims to provide a transparent and immutable ledger where all transactions are recorded and visible to participants. This transparency can foster trust among parties involved.
2. **Enhanced Security:** Blockchain employs cryptographic techniques to secure data, making it tamper-proof and resistant to unauthorized changes. The decentralized nature of blockchain also makes it less vulnerable to single points of failure or hacking attacks.
3. **Cost Reduction:** By eliminating intermediaries and streamlining processes, blockchain technology has the potential to reduce transaction costs significantly. This can be particularly beneficial in industries such as finance, supply chain management, and healthcare.
4. **Efficiency Improvement:** Blockchain enables faster and more efficient transactions by automating processes and reducing the need for manual reconciliation. Smart contracts, for example, can automatically execute predefined actions when certain conditions are met, eliminating the need for intermediaries.
5. **Decentralization:** One of the key objectives of blockchain is to create decentralized systems that are not controlled by any single entity. This decentralization can help mitigate the risk of censorship, manipulation, or single points of failure.
6. **Data Integrity:** Blockchain provides a tamper-evident and immutable record of transactions, ensuring data integrity and reducing the risk of fraud or data manipulation.

5-Days FDP on Block chain Technology

PROGRAMME OUTCOMES

Programme outcomes: The program outcomes for the 5-day Faculty Development Program (FDP) on Block chain Technology aims to achieve several key outcomes for participants. By the end of the program, participants will have a strong foundation in Block chain fundamentals, including its history, types, and components. They will acquire hands-on proficiency in Block chain development, capable of creating and deploying smart contracts and decentralized applications (DApps). Additionally, participants will gain an understanding of Block chain security, privacy considerations, and best practices, enabling them to audit and secure Block chain systems.

Participants will be equipped with knowledge in cryptography, use case identification across various industries, and awareness of scalability solutions and emerging trends in Block chain technology. They will also comprehend the regulatory and legal aspects of Block chain and establish a network of professional connections.

Educators will enhance their curricula, while all participants will receive a certificate of completion, showcasing their Block chain expertise. Furthermore, they will develop critical thinking skills and environmental awareness related to Block chain technologies, enabling them to contribute effectively to the Block chain ecosystem and its sustainable growth.

Summary Report

Date: 12-08-2019

No.of participants: 74

A 5-Days Faculty Development Programme (FDP) titled “**Block Chain Technology**” was organized for academic staff in **A.M. REDDY MEMORIAL COLLEGE OF ENGINEERING & TECHNOLOGY**. The program took place from August 05, 2019, to August 09, 2019. The FDP was led by **Dr.N.Gopal Krishna** an Assoc. Professor & HOD in the Department of CSE at **SAI TIRUMALA ENGINEERING COLLEGE**. During this FDP, faculty members gained profound insights into the evolving research landscape, the essential considerations when publishing papers in esteemed journals, and various innovative teaching methodologies.

The inaugural ceremony on August 05, 2019, was graced by the presence of Smt.Atluri Santhi Srinivasa Reddy garu, the Secretary & Correspondent, Dr.M. Ramakrishna, the Principal, Dr.A.Nageswaran, the Head of the CSE department, and the teaching staff from various departments.

On the same day, the session began with an introduction by the resource person, **Dr.N.Gopal Krishna**.

The second day session began at 10 a.m., with the resource person delivering his presentation on Block chain Data Structures Consensus Mechanisms: Proof of Work, Proof of Stake, etc.

On the third day, the session began at 10a.m. as normal, with a lecture on Ethereum and Solidity Programming, Creating and Deploying Smart Contracts.

On the fourth day, the session began at 10a.m. as normal, with a lecture on Security Threats and Vulnerabilities, Privacy and Anonymity in Block chain.

On the fifth day, the session began at 10a.m. as normal, with a lecture on Scaling Solutions (e.g..Sharding), Tokenization and Initial Coin Offerings (ICOs).

At the end of the session, the resource person was honoured by the Principal and CSE Staff members at AMRN Engineering College.

Respected Sir,

Sub: Request approval to conduct Seminar/workshop/FDP

On "**COMPUTER AIDED DESIGN AND ANALYSIS OF STRUCTURES USING FINITE ELEMENT METHOD CONCEPTS IN STRUCTURAL ENGINEERING**" -Reg,

The department of **CIVIL & AG** is planning to conduct a Seminar/workshop/FDP on "**COMPUTER AIDED DESIGN AND ANALYSIS OF STRUCTURES USING FINITE ELEMENT METHOD CONCEPTS IN STRUCTURAL ENGINEERING**" to All Department (Students/Staff) on **18-11-2019 to 23-11-2019** that benefits the students/staff for the Enhancing their knowledge. The resource person for the Seminar/workshop/FDP is **Dr.K.RATNA PRASADH, Associate Professor, and VVIT College of Engineering & Technology**. We request you to accord approval and grant the required amount for the smooth conduction of the Seminar/workshop/FDP.

Thanking you sir

ABOUT THE COLLEGE

A.M. Reddy Memorial College of Engineering and Technology (AMRN), popularly known as AM Reddy College was established in the year 2008, by A.M. REDDY EDUCATIONAL SOCIETY in Petlurivaripalem, Narasaraopet, Palnadu (Dt.) by Sri. A. SRINIVASA REDDY, the Chairman. AM Reddy College is affiliated to Jawaharlal Nehru Technological University Kakinada and approved by AICTE. AM Reddy College is located little far from the hustle and bustle of the city life in a scenic and serene environment spread over an extensive 10.9425 acres amidst the lush fields just 3 kms away from Sub-Urban of Narasaraopet. The institute has set a benchmark in providing its students the very best in terms of infrastructure and academic services. The college meticulously implements quality policy, absolute discipline, well ventilated classrooms, multimodal teaching methodology, additional trainings for campus placements, caring teachers, a dedicated canteen, separate hostel facilities for boys and girls, a fleet of buses, a mineral water plant, spacious auditorium, and outdoor grounds, and all supported with uninterrupted power backup.

ABOUT THE DEPARTMENT

The Department of Civil Engineering started functioning from the year 2009 in B.Tech programme with a permitted intake of 60 students and M.Tech with Structural Design, and Transportation Engineering specializations started functioning from the years 2013, and 2014 respectively with 18 students each in these two specializations. The Polytechnic programme in Civil (DCE) started in the year 2013 with 60 intake. The department is equipped with state-of-the-art laboratory facilities in the areas of Structural Engineering, Transportation Engineering, Geotechnical Engineering, Environmental Engineering, Engineering Geology, Surveying, Hydraulics and Hydraulics Machinery.

ABOUT THE PROGRAMME:

A 6-days program on Computer-Aided Design and Analysis program for structures using Finite Element Method (FEM) involves a substantial amount of code and would typically be implemented in a programming language like Python or MATLAB. Writing such a program from scratch is beyond the scope of a single response, but I can provide you with a basic outline and example code snippets to help you get started. Keep in mind that a complete and accurate structural analysis program requires a deep understanding of both structural engineering principles and numerical methods. This example covers the basic steps of a 2D truss structure analysis using FEM. Depending on your specific requirements and the type of structure you're analyzing (e.g., beams, frames, 3D structures), you may need to extend and modify the code accordingly. Additionally, error handling, convergence checks, and other considerations are important for a robust and practical implementation.

DAY 1	Inauguration
	Break
	Introduction
	Introduction to Finite Element Method (FEM) in Structural Engineering
DAY 2	Basics of Structural Analysis and FEM Software Overview
	Mesh Generation and Pre-processing, Hands-on Exercise: Mesh Generation with FEM Software
DAY 3	Material Properties and Assignments in FEM, Boundary Conditions and Loads
	Analysis Setup and Solving, Hands-on Exercise: Setting Up and Running a Structural Analysis
DAY 4	Post processing and Results Visualization, Interpretation of Analysis Results.
	Advanced Topics in FEM: Nonlinear Analysis, Hands-on Exercise: Post processing and Result Interpretation
DAY 5	Structural Optimization using FEM, Practical Applications and Case Studies, Dynamic Analysis and Response Spectrum,
	FEM for Special Structures (e.g., Trusses, Frames, Shells), Design Code Compliance in FEM
DAY 6	Composite Structures Analysis, Bridge Design and Analysis
	Project Work and Q&A Session, Valedictory

**A 6-Days FDP on Computer Aided Design and Analysis of Structures
Using Finite Element Method Concepts in Structural Engineering**

PROGRAMME OBJECTIVES

1. Provide a foundational understanding of Computer-Aided Design and Finite Element Method concepts in the context of structural engineering.
2. Develop proficiency in using industry-standard CAD software for creating accurate and detailed structural models.
3. Introduce fundamental concepts of the Finite Element Method, including discretization, element types, and the numerical solution of structural problems.
4. Enable students to create comprehensive 2D and 3D models of structures using CAD software and translate them into finite element models.
5. Familiarize students with the properties and behaviour of different structural materials and teach them how to incorporate this knowledge into FEM simulations.
6. Teach methods for performing static structural analysis, including the application of loads, determination of boundary conditions, and assessment of stress and deformation.
7. Introduce dynamic analysis concepts, including modal analysis and response spectrum analysis, to evaluate the dynamic behaviour of structures under varying conditions.

PROGRAMME OUTCOMES

1. Proficiency in using CAD software for creating accurate and detailed 2D and 3D models of structural components and systems.
2. Ability to apply fundamental concepts of Finite Element Method in structural analysis, including discretization, element types, boundary conditions, and material properties.
3. Capability to create complex structural models using CAD software and translate them into finite element models for analysis.
4. Knowledge of material behaviour and properties, and the ability to incorporate these parameters into finite element simulations.
5. Competence in performing static and dynamic structural analyses using FEM to evaluate the response of structures under various loading conditions.
6. Skill in analyzing stress and strain distribution within structures, identifying critical regions, and assessing the safety and performance of structural elements.
7. Ability to predict and analyze deflections and deformations in structures under different loading scenarios.
8. Familiarity with relevant structural design codes and standards, and the ability to design structures that comply with safety and regulatory requirements.

A 6-Days FDP on Computer Aided Design and Analysis of Structures Using Finite Element Method Concepts in Structural Engineering

Summary Report

Date: 25-11-2019

Number of participants: 73

A 6-Days Faculty Development Programme (FDP) titled "**Computer Aided Design and Analysis of Structures Using Finite Element Method Concepts in Structural Engineering**" was organized for academic staff in **A.M. REDDY MEMORIAL COLLEGE OF ENGINEERING & TECHNOLOGY**. The program took place from November 18, 2019, to November 23, 2019. The FDP was led by **DR.K.RATNA PRASAD** an Assoc. Professor & HOD in the Department of CIVIL at **VVIT COLLEGE OF ENGINEERING & TECHNOLOGY AND TECHNOLOGY**. During this FDP, faculty members gained profound insights into the evolving research landscape, the essential considerations when publishing papers in esteemed journals, and various innovative teaching methodologies.

The inaugural ceremony on November 18, 2019, was graced by the presence of Smt. Atluri Santhi Srinivasa Reddy garu, the Secretary & Correspondent, Dr.M. Ramakrishna, the Principal, Dr.M.Bhaskar Rao Head of the CIVIL department, and the teaching staff from various departments.

On the same day, the session began with an introduction by the resource person, **Dr.K.RATNA PRASAD**

The second day session began at 10 a.m., Basics of Structural Analysis and FEM Software Overview

On the third day, the session began at 10a.m. as normal, with a lecture on Material Properties and Assignments in FEM, Boundary Conditions and Loads.

On the fourth day, the session began at 10a.m. as normal, Post processing and Results Visualization, Interpretation of Analysis Results

On the fifth day, the session began at 10a.m. as normal, Structural Optimization using FEM, Practical Applications and Case Studies, Dynamic Analysis and Response Spectrum.

On the sixth day, the session began at 10a.m. as normal, with a lecture on Composite Structures Analysis, Bridge Design and Analysis, Project Work and Q&A Session, Valedictory

Respected Sir,

Sub: Request approval to conduct Seminar/workshop/FDP
on " **ADVANCES IN COMPUTATIONAL FLUID DYNAMICS** " -Reg,

The department of **EEE & MECH** is planning to conduct a Seminar/workshop/FDP on "**ADVANCES IN COMPUTATIONAL FLUID DYNAMICS** " to **All Department** (Students/Staff) on **24-02-2020 to 28-02-2020** that benefits the students/staff for the Enhancing their knowledge. The resource person for the Seminar/workshop/FDP is **P. MICHAEL, Associate Professor, NARASARAOPET COLLEGE OF ENGINEERING AND TECHNOLOGY**. We request you to accord approval and grant the required amount for the smooth conduction of the Seminar/workshop/FDP.

Thanking you sir

ABOUT THE COLLEGE

A.M. Reddy Memorial College of Engineering and Technology (AMRN), popularly known as AM Reddy College was established in the year 2008, by A.M. REDDY EDUCATIONAL SOCIETY in Petlurivaripalem, Narasaraopet, Palnadu (Dt.) by Sri. A. SRINIVASA REDDY, the Chairman. AM Reddy College is affiliated to Jawaharlal Nehru Technological University Kakinada and approved by AICTE. AM Reddy College is located little far from the hustle and bustle of the city life in a scenic and serene environment spread over an extensive 10.9425 acres amidst the lush fields just 3 kms away from Sub-Urban of Narasaraopet. The institute has set a benchmark in providing its students the very best in terms of infrastructure and academic services. The college meticulously implements quality policy, absolute discipline, well ventilated classrooms, multimodal teaching methodology, additional trainings for campus placements, caring teachers, committed staff, proactive managing committee, vigilant security, a dedicated canteen, separate hostel facilities for boys and girls, a fleet of buses, a mineral water plant, spacious auditorium, and outdoor grounds, and all supported with uninterrupted power backup.

ABOUT THE DEPARTMENT

The department of Electrical and Electronics Engineering (EEE) is part of the A.M.Reddy Memorial College of Engineering and Technology, which is located in Narasaraopet, Andhra Pradesh. The EEE department was established in the year 2008 with an intake of 60 students for the B.Tech program. It also offered M.Tech in Power Systems Engineering from 2012 to 2020 with an intake of 18 students. The vision of the department is to mould young and fresh minds into well-disciplined and competent engineers to excel in the field of Electrical and Electronics Engineering. The department has state-of-the-art laboratories, experienced faculty, and strong linkages with industry.

ABOUT THE PROGRAMME:

A 5-days Faculty Development Program (FDP) on Advances in Computational Fluid Dynamics (CFD) would typically involve a series of lectures, workshops, and hands-on sessions. Below is a sample outline for such a program. This program provides a broad overview of the key aspects of computational fluid dynamics, including fundamental concepts, numerical methods, meshing, pre-processing, solvers, post-processing, and advanced topics. Depending on the audience's background and expertise, the program can be adjusted to focus more on specific areas of interest or dive deeper into certain topics. Additionally, guest lectures from experts in the field could enhance the program's depth and relevance. This brief program outline captures the main components of an Advances in CFD workshop, touching on fundamental concepts, numerical methods, meshing, solvers, and advanced applications.

5-Days FDP on Advances in computational fluid dynamics

PROGRAMME OBJECTIVES

Date: 02-03-2020

This FDP aims to explore the research potential and challenges of Advances in computational fluid dynamics which have become very popular in the research community in recent years.

The objectives of this FDP are:

1. To provide participants with an in-depth understanding of the latest advancements and emerging trends in CFD, ensuring they are up to date with the state of the art in the field.
2. To enhance the participants' computational and problem-solving skills in the context of fluid dynamics, including hands-on experience with CFD software tools.
3. To equip participants with the ability to apply CFD techniques to real-world engineering and scientific problems, covering a wide range of applications
4. To explore advanced numerical methods, turbulence modelling, multiphase flows, heat transfer, and other specialized areas within CFD.
5. To teach effective mesh generation and pre-processing techniques, which are crucial for accurate CFD simulations.

5-Days FDP on Advances in computational fluid dynamics

PROGRAMME OUTCOMES

Programme outcomes: The program outcomes for Advances in computational fluid dynamics

Fundamental Understanding of Fluid Dynamics: Students should have a strong foundation in the principles of fluid dynamics, including the conservation equations, turbulence modelling, and fluid behaviour.

Numerical Methods and Algorithms: Graduates should be proficient in various numerical methods and algorithms used in CFD, including finite difference, finite volume, and finite element methods.

Software Proficiency: Students should be able to effectively use CFD software packages and understand the underlying algorithms, mesh generation, and post-processing techniques.

Problem Solving and Critical Thinking: Graduates should be skilled in formulating and solving complex fluid dynamics problems using CFD techniques and critically evaluating the results.

Advanced Simulation Skills: The program should equip students with the ability to perform advanced CFD simulations, including multiphase flows, heat transfer, and compressible flows.

5-Days FDP on Advances in Computational Fluid Dynamics

Summary Report

Date: 04-03-2020

No.of participants: 75

A 5-Days Faculty Development Programme (FDP) titled “Advances in computational fluid dynamics” was organized for academic staff in A.M. REDDY MEMORIAL COLLEGE OF ENGINEERING & TECHNOLOGY. The program took place from February 24, 2020, to February 28, 2020. The FDP was led by P. MICHAEL, an Assoc. Professor & HOD in the Department of EEE at NARSARAOPET COLLEGE OF ENGINEERING AND TECHNOLOGY. During this FDP, faculty members gained profound insights into the evolving research landscape, the essential considerations when publishing papers in esteemed journals, and various innovative teaching methodologies.

The inaugural ceremony on February 17, 2020, was graced by the presence of Smt. Atluri Santhi Srinivasa Reddy Garu, the Secretary & Correspondent, Dr.M. Ramakrishna, the Principal, Dr S.Senthilkumar the Head of the EEE department, and the teaching staff from various departments.

On the same day, the session began with an introduction by the resource person P. MICHAEL

The second day's session commenced at 10 AM, with the resource person delivering a lecture on the objectives of Advances in computational fluid dynamics, Time Integration Methods, Spatial Discretization Techniques.

On the third day, the session also began at the usual time of 10 AM, with a lecture on the Mesh Generation Techniques, Geometry Clean-up and Preparation, Boundary Conditions and Pre-processing, Hands-on Mesh Generation.

On the fourth day, the session also began at the usual time of 10 AM, with a lecture on Turbulence Modelling (RANS, LES, DNS), Multiphase and Reactive Flows, Heat Transfer and Conjugate Heat Transfer, Parallel Computing & High-Performance Computing in CFD

On the fifth day, the session also began at the usual time of 10 AM, with a lecture on Automotive and Environmental CFD, Bio fluid Dynamics and Medical Applications, Industry-Specific Case Studies and Future Trends

Respected Sir,

Sub: Request approval to conduct Seminar/workshop/FDP**On "CMOS INTEGRATED CIRCUITS FOR INSTRUMENTATION & IOT APPLICATION" -Reg,**

The department of ECE & CSE is planning to conduct a Seminar/workshop/FDP on "**CMOS INTEGRATED CIRCUITS FOR INSTRUMENTATION & IOT APPLICATION**" to All Department (Students/Staff) on **18-05-2020 to 22-05-2020** that benefits the students/staff for the Enhancing their knowledge. The resource person for the Seminar/workshop/FDP is **Dr.N.TIRUMALA RAO, Professor, and NARASARAOPET COLLEGE OF ENGINEERING AND TECHNOLOGY**. We request you to accord approval and grant the required amount for the smooth conduction of the Seminar/workshop/FDP.

Thanking you sir

ABOUT THE COLLEGE

A.M. Reddy Memorial College of Engineering and Technology (AMRN), popularly known as AM Reddy College was established in the year 2008, by A.M. REDDY EDUCATIONAL SOCIETY in Petlurivaripalem, Narasaraopet, Palnadu (Dt.) by Sri. A. SRINIVASA REDDY, the Chairman. AM Reddy College is affiliated to Jawaharlal Nehru Technological University Kakinada and approved by AICTE. AM Reddy College is located little far from the hustle and bustle of the city life in a scenic and serene environment spread over an extensive 10.9425 acres amidst the lush fields just 3 kms away from Sub-Urban of Narasaraopet. The institute has set a benchmark in providing its students the very best in terms of infrastructure and academic services. The college meticulously implements quality policy, absolute discipline, well ventilated classrooms, multimodal teaching methodology, additional trainings for campus placements, caring teachers, committed staff, proactive managing committee, vigilant security, a dedicated canteen, separate hostel facilities for boys and girls, a fleet of buses, a mineral water plant, spacious auditorium, and outdoor grounds, and all supported with uninterrupted power backup.

ABOUT THE DEPARTMENT

The CSE department offers B.Tech in Computer Science and Engineering. The department has well-equipped computer labs, qualified faculty, and industry collaborations. The department aims to provide quality education and training to the students in the field of computer science and engineering¹. The department was established in 2008 with an intake of 120 students for the B.Tech program and 18 students for the M.Tech program. The department has six computer labs with 368 systems with high configuration and fully air-conditioned, along with an incubation center¹. The department also conducts various events and activities to enhance the students' skills and knowledge.

ABOUT THE PROGRAMME:

This five-days program on CMOS integrated circuits in instrumentation and IoT applications would typically involve a combination of hardware description languages (HDLs) and possibly low-level programming languages for embedded systems. Writing such a program requires a detailed understanding of the specific CMOS IC, instrumentation requirements, and IoT protocols. However, I can provide you with a simple example using a hypothetical scenario. Keep in mind that this is a basic illustration and may not cover all aspects of a real-world application. This is a basic Python program that simulates a CMOS integrated circuit in an IoT sensor node. In a real-world application, you would need to use appropriate libraries or frameworks based on the hardware and communication protocols involved.

**5-Days FDP on CMOS integrated circuits for instrumentation & IOT
Application**

PROGRAMME OBJECTIVES

Date: 25-05-2020

This FDP aims to explore the research potential and challenges of CMOS integrated circuits for instrumentation & IOT Application which have become very popular in the research community in recent years.

The objectives of this FDP are:

1. Develop CMOS integrated circuits with optimized power consumption to extend battery life in IoT devices and reduce energy costs in instrumentation applications.
2. Design compact CMOS ICs to meet the size constraints of IoT devices and enable the integration of multiple functions in a small form factor for instrumentation applications.
3. Achieve high levels of integration on a single CMOS chip to reduce system complexity, minimize component count, and enhance reliability for both instrumentation and IoT applications.
4. Develop CMOS ICs with efficient sensor interfaces to interface with various sensors used in instrumentation and IoT devices, such as temperature sensors, humidity sensors, accelerometers, and gyroscopes.
5. Incorporate wireless communication capabilities (e.g., Wi-Fi, Bluetooth, Zigbee, LoRa) into CMOS ICs to enable seamless connectivity and data exchange between IoT devices and instrumentation systems.

5-Days FDP on CMOS integrated circuits for instrumentation & IOT Application

PROGRAMME OUTCOMES

Programme outcomes: The program outcomes for CMOS integrated circuits for instrumentation & IOT Application

- 1. Mastery of CMOS Design:** Graduates should have a deep understanding of CMOS (Complementary Metal-Oxide-Semiconductor) design principles, including transistor-level design, layout, and optimization.
- 2. Sensor Integration:** Graduates should be proficient in integrating a variety of sensors into CMOS circuits, understanding their specifications, and ensuring accurate and reliable data acquisition for instrumentation and IOT applications.
- 3. Analog and Digital Integration:** Participants should be capable of seamlessly integrating analog and digital circuitry within a single chip, addressing the unique signal processing and data conversion requirements of instrumentation and IOT applications.
- 4. Low-Power Design:** Graduates should be skilled at designing CMOS circuits with a strong emphasis on low power consumption, extending the battery life of IOT devices and reducing energy costs in instrumentation.
- 5. Wireless Communication:** Participants should be adept at incorporating wireless communication modules, enabling IoT devices to connect to networks and other devices while managing power consumption efficiently.
- 6. Noise Management:** Graduates should be capable of designing circuits with minimal noise and high signal-to-noise ratios, ensuring accurate data acquisition in instrumentation applications.

Summary Report

Date: 27-05-2020

No. Of participants: 66

A 5-Days Faculty Development Programme (FDP) titled “**CMOS Integrated Circuits for Instrumentation & IOT Application**” was organized for academic staff in **A.M. REDDY MEMORIAL COLLEGE OF ENGINEERING & TECHNOLOGY**. The program took place from May 18, 2020, to May 22, 2020. The FDP was led by **Dr.N.TIRUMALA RAO**, an Assoc. Professor & HOD in the Department of CSE at **NARSARAOPETA ENGINEERING COLLEGE**. During this FDP, faculty members gained profound insights into the evolving research landscape, the essential considerations when publishing papers in esteemed journals, and various innovative teaching methodologies.

The inaugural ceremony on May 18, 2020, was graced by the presence of Smt. Atluri Santhi Srinivasa Reddy garu, the Secretary & Correspondent, Dr.M. Ramakrishna, the Principal, Dr S.Arun, the Head of the ECE department, and the teaching staff from various departments.

On the same day, the session began with an introduction by the resource person, **Dr.N.TIRUMALA RAO**

The second day's session commenced at 10 AM, with the resource person delivering a lecture on the Transistor Models and Characterization, Digital Logic Design with CMOS, Design Principles for Low Power, Lab Session: Basic CMOS Circuit Design Exercises

On the third day, the session also began at the usual time of 10 AM, with a lecture on the Sensors and Transducers, Signal Conditioning and Amplification, Noise in CMOS Circuits and Noise Reduction Techniques, Data Converters: ADCs and DACs

On the fourth day, the session also began at the usual time of 10 AM, with a lecture on Introduction to IOT and Its Applications, IOT Sensors and Actuators, Communication Protocols for IOT, Low Power Design for IOT Devices

On the fifth day, the session also began at the usual time of 10 AM, with a lecture on CMOS Power Amplifiers for IOT Applications, System Integration and Testing, Case Studies: Real-world IOT Projects, Q&A and Participant Presentations
