A Green campus is a place where environment friendly practices and education combine to promote sustainable and eco-friendly practices in the campus. The green campus concept offers an institution the opportunity to take the lead in redefining its environment culture and developing new paradigms by creating sustainable to environment, social and economic needs of the mankind.

Objectives to the go green campus: the first step of going to green campus involves establishing green campus within the organizational structure of the institute. Hence to give this initiative more clarity and authenticity, we now roll out a POLICY DOCUMENT spelling out the strategies, plans and other allied tasks to make this program functional officially.

We believe that greening the campus is all about sweeping away wasteful inefficiencies and using conventional sources of energies for its daily power needs, correct disposal handling, purchase of environment friendly supplies and effective recycling program. The administration of the institute believes that every one has to work out the time bound strategies to implement green campus initiatives. These strategies need to be incorporated into the institutional planning and budgeting processes with the aim of developing a clean and green campus. Every individual of AM Reddy Memorial College of Engineering and Technology will work, may he/she be a student, staff and faculty to foster a culture of self-sustainability and make the entire campus environmental friendly.

- Understanding various environmental issues and the need to address them.
- Sensitizing people about the need for protection of environment for a sustainable and healthy future.
- Instill a sense of responsibility for the environment and a personal commitment to protect and preserve the environment.
- Undertaking technological setup aimed at an environmentally and economically strong impact
- Ensure environmental friendly practices in the college.

Green Campus Initiatives:

- To assess our energy usage and measure its impact on the environment.
- Installation of Solar Power Pannels for alternative energy
- Turn off your monitor when you leave your table. Whenever possible, shutdown rather than logging off.
- Turn off unnecessary lights and use daylight instead.
- Waste water / Rain water management
- Effective maintenance of water bodies and distribution system in the campus.

- Plastic free campus
- To undertaken Tree plantation drive
- Electrical power bill savings by use of LED bulbs in the campus
- Switch off lights, fans in conference rooms, classrooms, lecture halls when they are not in use. Avoid the use of decorative lighting.
- Use the fans only when they are needed.
- In hostels install the water heaters with non-conventional energy resources.
- To reduce local air pollution emission using bicycles, public transportation and use of pedestrian – friendly roads.
- Use more read out material in soft form. Reduce the hard form of readout material. Use more of email for officially communicating the information needed, online reading etc.
- Keep a stack of paper that has been printed on one side and use it for day to day rough work.
- Use two types of dust bins separately in the campus for biodegradable and non-biodegradable wastes in the college campus as well as in hostels. Reusing the classroom furniture by making necessary altering them, thereby reducing the metal and wood waste.
- Providing washrooms with incinerators to destroy sanitary napkins for easy disposal in an environment friendly way.

AM Reddy Memorial College of Engineering and Technology has taken initiative to create awareness on Green Campus. To protect its own environment with its green campus initiative and maintains pollution free campus.
