ERP DOCUMENT

Enterprise Resource planning (ERP) has to be utilized by the institution for a smooth and better functioning with a centralized and integrated system. The institution has to manage the data of the stakeholders (student,staff,parents) and also the issues related to administration,accounts,examination,library and transport by utilizing the ERP software.

ERP unifies many functional areas of the institution that have many sub functions associated which are related to stakeholders. Based on the organizational grading, rights are assigned to exercise and execute day to day activities. With the centralized database of the ERP system the data will be retrieved more easily and precisely and the data thus extracted can be utilized to prepare and analyze the report. As long as the vendor provides assistance to the software and maintenance, the ERP will be an excellent tool to manage the activities of the institute.

The institution purchased automation package (LOTUS) from lotus solutions in the year 2021. This software fulfills all the requirements of our institution which includes academic and administrative activities of undergraduate and post graduate programs with transparency.
