PROGRAM REPORT

Name of the Program: A Two Day Work Shop on "MAT LAB"

Date: 13/03/2019 to14/03/2019.

Time: 10:00 A.M.

Resource person details:

Name: P.V. SATEESH KUMAR

Designation: Asst.Professor

College: SAI TIRUMULA NVR ENGINEERING COLLEGE

Mobile No: 9515292562.

A Two day work shop conducted on **"MAT LAB"** From 13/09/2019 to 14/09/2019.the program was initiated by in charge HOD of ECE Dept. P. Michel Chollines, who expressed his gratitude to the speaker, for presenting a program conducted by ECE Dept.

During the workshop, the resource person discussed the fundamentals of MATLAB is a high-performance language for technical computing. It integrates computation, visualization, and programming in an easy-to-use environment where problems and solutions are expressed in familiar mathematical notation. Typical uses include: Math and computation Algorithm development Modeling, simulation, and prototyping Data analysis, exploration, and visualization Scientific and engineering graphics Application development, including Graphical User Interface building MATLAB is an interactive system whose basic data element is an array that does not require dimensioning. This allows you to solve many technical computing problems, especially those with matrix and vector formulations, in a fraction of the time it would take to write a program in a scalar non interactive language such as C or FORTRAN. The name MATLAB stands for matrix laboratory. MATLAB was originally written to provide easy access to matrix software developed by the LINPACK and EISPACK projects, which together represent the state-of-the-art in software for matrix computation.

PROGRAM REPORT

Name of the programe: A Two Day Work Shop on "INTERNET OF THINGS "

Date: 27/09/2019 to 28/09/2019

Time: 10:00 A.M

Resource person details:

Name: V.V. B CHARI

Designation: Asst.professor

College: In house faculty

Mobile No: 9985994890.

A Two day work shop conducted on **"INTERNET OF THINGS "From** 18/02/2020 to19/02/2020.the program was initiated by in charge HOD of ECE Dept. P.Sudheer Kumar, who expressed his gratitude to the speaker, for presenting a program conducted by ECE Dept.

During the workshop, In conclusion, internet of things is the concept in which the virtual world of information technology connected to the real world of things. The Internet of Things is happening now, and there is a need to address its challenges and maximize its benefits while reducing its risks. The Internet Society cares about IOT because it represents a growing aspect of how people and institutions are likely to interact with and incorporate the Internet and network connectivity into their personal, social, and economic lives. Solutions to maximizing the benefits of IOT while minimizing the risks will not be found by engaging in a polarized debate that pits the promises of IOT against its possible perils. Rather, it will take informed engagement, dialogue, and collaboration across a range of stakeholders to plot the most effective ways forward.

A Two day work shop conducted on "CYBER SECURITY AND ETHICAL HACKING "From **30/10/2020 to 31/10/2020.** The program was initiated by In charge HOD of CSE Dept. N.Anjaneyulu, who expressed his gratitude to the speaker, for presenting a program conducted by CSE Dept.

Objective

This seminar on Cyber security and Ethical Hacking was organized by the college to raise awareness and educate students about the risks associated with cybercrime and the measures that can be taken to prevent such activities. The seminar aims to educate participants about the importance of cyber security and how it can be used to protect sensitive data and information.

Outcome

The outcomes of this seminar on Cyber Security and Ethical Hacking was students were able to learn about types of attacks, attackers and security threats and vulnerabilities present in the computer system as well as tools and techniques to safeguard oneself in cyber space.

Some of the key takeaways form these seminars were:

Principal
A.M REDDY MEMORIAL COLLEGE OF
ENGINEERING & TECHNOLOGY
PETLURIVARI PALEM

1. **Increased awareness:** Participants gained a better understanding of the importance of cyber security and ethical hacking, the risks associated with cybercrime. This will help them to be more vigilant and take appropriate measures to protect their personal and professional information.

2. **Improved knowledge:** The seminar equipped participants with the knowledge and skills required to implement effective cyber security measures and defend against cyber threats. They learnt about the latest tools and techniques used by ethical hackers to identify vulnerabilities and mitigate risks.

3. **Enhanced security:** By implementing the strategies and recommendations provided in the seminar, participants will be able to enhance the security of their systems and networks. This will reduce the risk of data breaches, identity theft, and other forms of cybercrime.

4. **Increased collaboration:** The seminars provided a platform for participants to network and collaborate with the professionals in the field. This led to the sharing of ideas and best practices.

5. **Greater confidence:** Armed with the knowledge and skills gained from the seminar, participants gained greater confidence in their ability to protect themselves and their organizations from cyber threats.

A Two day work shop conducted on ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING From 23/02/2022 to 24/02/2022.the program was initiated by in charge HOD of CSE Dept. Dr. B.CHANDRA SEKHAR, who expressed his gratitude to the speaker, for presenting a program conducted by CSE Dept.

A workshop on artificial intelligence and machine learning (AI/ML) for advanced reactors (AR) was held October 5-6, 2021. The workshop was to be attended in-person at ANL but COVID restrictions forced the workshop to go virtual. The objectives of the workshop were to identify the most promising AI/ML opportunities for improving advanced reactor design, optimizing plant performance, and enhancing economic competitiveness and to develop an understanding of the scientific, engineering and licensing challenges facing their application. The workshop planning committee included GAIN, EPRI and NEI and members of three national laboratories (ANL, INL, and ORNL). The workshop was attended by more than 200 individuals representing academic and scientific institutions and the nuclear power industry. The definition put forth for an AI/ML system was one that perceives its environment and takes actions that maximize its chance of achieving its goals. In this report AI/ML refers to next generation algorithms that include deep learning, statistical analysis and data analytics and associated scientific computing and their potential application to the design, licensing, operation and maintenance of ARs. These methods typically

PROGRAM REPORT

Name of the Program: A Two Day Work Shop on "FINGER PRINT AUTHENTICATION"

Date: 16/12/2022 to 17/02/2022.

Time: 10:00 A.M.

Resource person details:

Name: P. PARAMESWARA RAO

Designation: Asst.professor

College: SRI MITTAPALLI COLLEGE OF ENGINEERING

Mobile No: 9985255876.

A Two day work shop conducted on FINGER PRINT AUTHENTICATION From 16/12/2022 to 17/12/2022.the program was initiated by in charge HOD of ECE Dept. P SURYA GANESH, who expressed his gratitude to the speaker, for presenting a program conducted by ECE Dept.

A workshop on "FINGER PRINT AUTHENTICATION'' was held October 16/12/2022 to 17/12/2022. A biometric factor is something physiologically unique about an individual, such as a fingerprint, facial image, iris, voice pattern, and handwriting. When an individual wants logical or physical access (depending on the implementation), a sample is taken of the authenticities biometric data, for example, a fingerprint. Then, the authenticator, using a previously enrolled version of the same biometric template can match the

sample against the stored template to verify the individual's identity" "Biometrics are not secret, as everyone leaves fingerprints everywhere they go, faces and eyes can be photographed, voices can be recorded, and handwriting samples can be obtained.

The security of the fingerprint authentication system therefore relies on the integrity and authenticity of the biometric information"1, therefore careful evaluation must be done for the selection of the fingerprint
